What's Happening in WHSD?

The Woodland Hills School District has partnered with multiple school districts in Western Pennsylvania as well as Special Olympics Pennsylvania to develop a unified robotics program and competition. On Wednesday, September 18, educators from those school districts met at Woodland Hills High School for a day of professional development that focused on how to build and develop the programs in each of their school districts.

The unified robotics program pairs neurotypical and neurodiverse students in a competitive yet collaborative environment, all while developing their skills as communicators, engineers, problem solvers, and more. Each team features a mix of regular education and special education students as they work together to score as many points as they can on VEX Robotics' VEX IQ Competition Rapid Relay field. Woodland Hills has partnered with VEX Robotics over the past three years to integrate a K-12 robotics curriculum into the district and to launch after-school clubs like the middle school competitive robotics team at Dickson Preparatory STEAM Academy, the Mother-Daughter Robotics Club at Rankin Community Center, and a VEX IQ elementary competitive robotics team that is new this school year.

The goal is to provide an environment that promotes respect, empathy, and collaboration between students with and without special needs, all while fostering a fun and competitive atmosphere. All students are welcome, and no experience is necessary to be part of the program. The September training introduced other districts to the robotics kits and the process of forming a team. The schools will meet on December 13 for a friendly competition.

Woodland Hills was proud to host a College and Career Fair on Thursday, Sept. 26 that included nearly 50 local, state, regional, and national universities, along with trade schools, employers, and branches of the armed services.

Not only did Woodland Hills students have the opportunity to talk with admissions representatives and human resources staff members from these organizations, but the school hosted students from Clairton, East Allegheny, Steel Valley, and Sto-Rox for the fair, as well.

The event was made possible thanks in part to [DoD STEM](#), which runs the SMART Scholarship-for-Service Program. The program offers full tuition scholarships and a monthly stipend to college students pursuing eligible STEM degrees at accredited universities. Upon graduation, SMART Scholars are guaranteed employment in their field with the Department of Defense as a civilian employee for four years.

Students were able to chat with a representative from DoD STEM about the program during the college and career fair.
